

RACE TIMING SOLUTIONS 精銳計時

Mobile Antenna user guide

- 1. Turn on the Android mobile phone by Pressing the Button on the right side of the phone. Check the network connectivity.

Step1

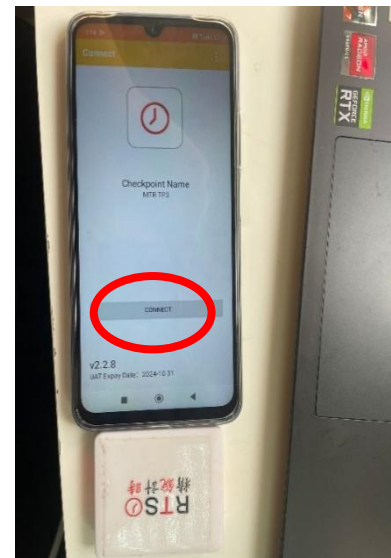

- 2. Click on “RTS” app

Step2

- 3. Insert the RFID Reader to the phone. The RFID Reader will keep flashing red and blue lights.

then click “CONNECT”

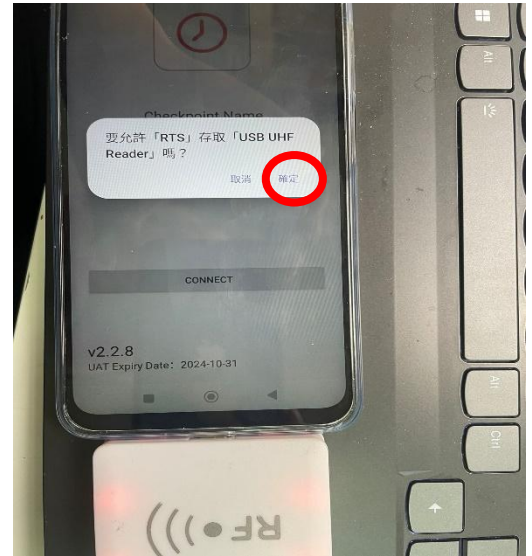

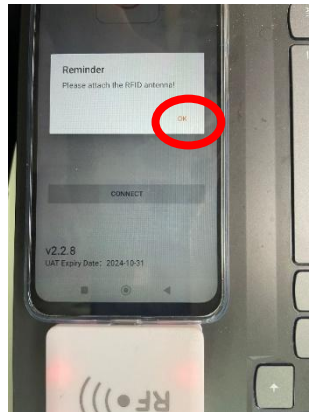

Step3

Mobile Antenna user guide

- 4. After you click “CONNECT”

Then click “OK”

- 5. After connecting the Reader to the phone, the message “Ready for scanning” will be shown. Now please scan the given test chip (9999) to test whether it works or not. The code 9999 will be shown on the screen if it functions properly. The screen will turn **yellow** and scanning sound, that means it keeps scanning.

The scanned chip code data which is not uploaded to server to be displayed in **BLACK** while the uploaded data will be presented in **GREEN** color.

Step4

Friendly Reminders:

- ✓ Volunteers can allocate the task to oneself namely one doing the scanning and another one jotting down on the form provided with clipboard (both bib no. & time arrival).
- ✓ If several runners arrive at the same time, just ask them to stay put and queue up to be scanned by the RFID Reader one by one in time order.
- ✓ The phone without RFID Reader must keep charging during the race.
- ✓ Just take it as an octopus card regarding its range of detection.
